To whom it may concern,

The enclosed application is for original certification that the ThinkEco modlet BN, model TE4010 with FCC ID Y38TE4010, is compliant with Part 15.247 of the FCC Rules. The ThinkEco modlet BN is an energy-saving outlet retrofit which allows for remote switching of everyday appliances and measures their power usage. The modlet BN works in tandem with a USB Receiver that, when inserted into a computer with ThinkEco software installed, creates a wireless network in compliance with the ZigBee protocol to allow modlet BNs within range to communicate with the computer, completing the ThinkEco modlet system.

Enclosed, please find the necessary technical documents for certification.

Thank you,

Ben Burns
Senior Product Engineer
ThinkEco, Inc.
